

Perma-Cast® Sierra Stain™ is a penetrating reactive stain that chemically combines with cured concrete to produce permanent variegated coloring effects. Perma-Cast® Sierra Stain™ is perfect for exterior hardscapes, artificial rock formations, interior floors, walls, statuary and countertops. Because there are so many variables involved in the chemical reaction process i.e. the age, porosity, texture and color of the concrete substrate each application of Perma-Cast® Sierra Stain™ produces unique results. Wide color variations, mottling, and unevenness of the color is normal and usually desired. If these effects are not desired Butterfield Color® Elements™ Transparent Concrete Stain should be substituted.

*** INDICATES FOR INTERIOR USE ONLY**

BAS-11 Tannin

BAS-12 Balkan Amber

*BAS-13 Verdigris

BAS-15 Stygian

*BAS-16 Caribbean

BAS-14 Cordovan Leather
