

ribbon blender

**C**olorfast is a ready-to-use, finely ground blend of synthetic iron oxide pigments and proprietary admixtures designed for coloring cementitious materials and toppings.

## USE

**Colorfast** is used as an integral ad-mixture for permanently coloring **Pentimento, Sgraffino, Rotofino** and **Pasto**.

## FEATURES

1. Superior wet-ability, alkali resistant, curing stability and light fastness
2. Unlimited variations of color through pigment blending
3. Integral color maker
4. Flexibility in depth and tone of color
5. ASTM C 979 82 acceptable synthetic iron oxide pigments

## INTEGRAL COLORING

When using **Colorfast** always disperse pigments into **COLORMAKER** activator CP1000 prior to adding cementitious powder. This process will allow for greater color consistency.

## SHAKE-ON COLORING

Once perfected by the installer the shake-on coloring process allows for a more dramatic variegation in color shading. This is achieved simply by shaking on and toweling small amounts of dry pigment into the wet mix. It is always advisable to include large mock-ups for this coloring technique prior to proceeding with the project.

## COVERAGE

**Colorfast** is available in 10 lb (4.5 kg) pails. Coverage is based upon the desired color intensity and can vary considerably. Standard dosage is from ¼ to 2 cups per bag of **Pentimento, Sgraffino, Rotofino, or Pasto**.

## WARRANTY

**Colorfast** is warranted to be of uniform quality within manufacturing tolerances. Since control is not exercised over its use, no warranty, expressed or implied, is made as to the effects of such use. The seller's and manufacturer's obligation under this warranty shall be limited to refunding the purchase price of that portion of the material proven to be defective.

## HEALTH CAUTION

During mixing and application avoid contact with eyes and prolonged contact with skin. In case of contact with eyes, flood repeatedly with water and **CALL A PHYSICIAN**.
